

I would like a copy of any information EPA has gathered as of Oct. 24, 2018, or a prior recent date, that lists any facilities or sources in the United States that have sought a permit modification or other change in status as a result of the withdrawal in January 2018 of the Once in Always In policy. I am not asking the EPA to prepare a list for me. I am asking for any list that EPA has already created. Please include all the fields of information that are on any list responsive to this request.
